

Scarlet Key Appoints Honourary Members

Photo by Coronet

THE SCARLET KEY today announced the appointment of four new honorary members. They are from left to right, Hugh Walker, Chairman of the Freshman Reception Committee and the Winter Carnival; Gor-

don J. Wasserman, Editor-in-Chief of the McGill Daily; Bill Stavert, Chairman of MCWA; and Leo Konyk, outstanding football and hockey player. Similar appointments are made annually.

Summer Sessions Held On Activities Programme

SEC Discusses Conference, Union Repairs; Decides Against Financing Summer Revue

The Students' Executive Council and its Summer Committee met four times during the holiday months. A number of important issues came up for consideration including discussion on the financial operations of The Red and White Revue's summer run of 'Wry and Ginger', ratification of the proposed constitution of the newly-formed Association of Quebec Universities and the question of the budget for this year's edition of the McGill Conference on World Affairs (M.C.W.A.) scheduled for the end of November.

Also embodied in the work done by the Council was the approval of several appointments to posts in University clubs and activities.

The meetings of the regular Students' Executive Council were held on May 12, and September 11. The specially appointed Summer Committee of the Council sat on June 25 and August 14.

WRY AND GINGER

The S.E.C. agreed to subsidize Runcible Productions in their project to stage 'Wry and Ginger' in Montreal as a professional venture. It was hoped that the profits made by the group would defray the Council's financial commitment in the affair. Six thousand seven hundred dollars were approved as reserve for Runcible Productions. Of this amount, four thousand dollars had been advanced by June 25. The former figure was obtained by calculating final costs in the condition that the run was a complete failure. The size of the advance thus enabled Wry and Ginger to plan for and count on an extended run.

FINANCIAL FAILURE

The summer run was not a financial success. Although the Ottawa run paid for itself, in Montreal the group lost a considerable sum. At a meeting of the Summer Committee on August 14, it was estimated that

total loss for the venture would reach approximately \$5,410. Actually the final figure was somewhat smaller, being \$4,910.

Only One To Survive From Sinking Raft

The 1958 'Professors' Raft' will be held tomorrow in the Union Ballroom at 8 pm. This is an annual event, planned by the Freshman Reception Committee, presented in the style of an informal debate.

The hypothetical situation is that of four professors stranded on a raft with food for only one to survive. Presuming that one professor will continue to contribute his ideas and effort to the world, the argument will therefore center around which one of the learned men is best equipped by virtue of his chosen field to contribute most, and thus be worthy of surviving. The others, of course, will voluntarily jump overboard. Questions will be invited from the audience.

The participating professors from the four undergraduate faculties this year are: Professor Kierans of Commerce; Professor Gibbs of Science; Professor Sleight of Arts; and Professor Joly of Engineering. Dean Frost of Divinity will be the moderator.

After the debate, refreshments will be served, and all students are invited to mingle with, and talk to, their professors.

A motion to the effect that the S.E.C. would not again support a Red and White Revue summer-run was passed unanimously.

On May 12 the Council ratified the proposed constitution for the Association of Quebec Universities (A.U.Q.). At that date the University of Sherbrooke alone had not pronounced itself on the document. However the University formally accepted the constitution soon after.

It was decided on June 25 to apply once more to the Premier for a meeting with student heads. Chairman of the S.E.C., Roy Heenan, told the meeting that 'Les Trois', three students from the University of Montreal, were continuing on their province-wide tour whose purpose was to arouse in the population an interest in student affairs. Heenan later appeared on a T.V. broadcast with 'Les Trois'.

MCWA DISCUSSED

At the meeting of the S.E.C. on the eleventh of this month, the Chairman of the McGill Conference on World Affairs, W. Stavert, reported that Committee efforts to find financial support from without the university had met with Dr. F. Cyril James' disapproval. Principal James felt that such demands by a group within the university would harm McGill's position in regard to fund raising.

Noted Physicist Recalls Work of Rutherford

by Dave Mayerovitch

A man who worked under Lord Ernest Rutherford and went on himself to win a Nobel prize in physics delivered the second Rutherford Memorial Lecture in Moyse Hall last night.

British scientist P.M.S. Blackett, a researcher in nuclear physics, a field pioneered by Rutherford at McGill, Manchester, and Cambridge, spoke of Rutherford and his work. He also outlined recent advances in the field, illustrating the lecture with photographs including some of his own, showing discoveries in the realm of sub-atomic particles.

The lecture was under the auspices of the Royal Society of London, which perpetuates the memory of Rutherford by sponsoring lectures by former associates of the pioneer at places where he made some of his great discoveries.

It was at McGill that Rutherford, who came here in 1898, first discovered the spontaneous decay of radioactive elements and interpreted the phenomenon correctly as the transmutation of one element into another.

Professor Blackett, who is presently Dean of the Royal College of Science in South Kensington, first came into contact with Rutherford at the Cavendish Laboratory at Cambridge in 1921.

Professor Blackett, then a recent graduate, was set to work by Rutherford on the study of the bombardment of the nitrogen atom by alpha-particles and the resulting transformations. The chief instrument used in this research was C.T.R. Wilson's cloud chamber, which enabled experimenters to observe the tracks left by atomic particles as they underwent collision with each other. Valuable information about the composition of matter and about the elementary particles was thus unearthed.

The lecturer recalled Rutherford the man as well as the scientist. He commented on Rutherford's faith in experiment to determine truths, while having slight disrespect for pure theorists, whom he once described as "playing with their toys".

Professor Blackett paid tribute to Rutherford as an organizer and planner of scientific work. He expressed appreciation of Rutherford's setting problems for

young men like himself, who, he said, would otherwise have been without clear objective. He spoke of Rutherford's genius for planning the directions of research, instinctively knowing which lines of investigation would prove fruitful and which would not.

Professor Blackett recalled how Rutherford had speculated

(Continued on page 3)

Union Changes Affect Services

A change of services, and therefore rules, is now in effect in the Students' Union.

The most important of these, the Rooms reservation, required that organizations wishing to reserve a room must apply at the Box Office. Application is not confirmation, so be sure to check after several days whether or not the room will be made available to you.

Poster Service will be provided for any campus organization, providing a form is obtained from the Tuck Shop and placed in the mail box of the Poster Press Office in the workshop at least one week in advance.

UNION IMPROVEMENTS

In the lobby, the Grill Room and Cafeteria were made more conducive to pleasant dining, by the addition of venetian blinds and fluorescent lighting in the former and tablecloths and rails in the latter. Partitions were placed in the Lounge with a view to eventually acquiring furniture and having a reading room. The Salon, now an office, will also become a reading room. A new stairway has been built to the attic. The room at the top of these stairs, previously a store room, has been renovated with a view to being utilized as an office.

Other available services are the rental of electrical equipment, the public address system, catering, and liaison between the Union and the organizations.

This Morning's Headlines News of National and World Significance

- Taipei, Formosa, Sept. 29 — (Reuters) — American soldiers will not be asked to fight in defence of Nationalist China's offshore islands, Nationalist Leader Chiang Kai Shek said today. However he told a press conference he would bomb Communist China's mainland bases if it became "a matter of life and death."
- The possibility of the Diesel firemen dispute going back to conciliation again was raised yesterday in the wake of the Canadian Pacific Railway refusal to reconsider the controversial question. Meanwhile a ballot form asking 130,000 railway workers to vote by Nov. 1 on whether to go on strike against the major railways is now in the hands of union officials across Canada.
- Ottawa, Sept. 29 — (CP) — Canada has asked the United States to release atomic weapons to the Canadian armed forces.

Soccermen Meet Georgians Wed.

McGill's highly rated soccer team will have their first test of the year this Wednesday evening against Sir George Williams College on the upper field.

After approximately one week of practicing, the team is shaping up well according to the coach, Brian Cleary, who thinks that the team will win against Sir George.

However, Toronto, McGill's arch rivals, will present a very much tougher test. In last year's two game series against Toronto for the championship, McGill tied one and lost the other.

This year though the team is determined to bring home the laurels.

Back with the team are six or seven of last year's men. Aside from these players, there are about forty hopefuls. Steed at left wing and Rigsby at left half are two of last year's holdovers. Looking well to date among the newcomers are Wright and Okulaja who are both good prospects for forward positions.

Although the team is not entered in any league this year, it does not change the situation

McGill Indians To See Opener Wed.

As the 1958 Football season opens for the McGill Indians, they find themselves in the Junior Q.R.F.U.

After having won the Ottawa-St. Lawrence Conference Championship in 1954, the Indians dropped out of the league and played exhibition games throughout 1955 and 1956. In 1957 they played a partial schedule in the Junior Q.R.F.U. and this year will be ready to go in their first full league games since winning a championship.

Head Coach Dave Copp, ably assisted by Line Coach Tom Gallagher have had their squad practicing daily since September 22 in preparation for their first game on Wed. Oct 1 at 8 pm. at Morgan Park in Rosemount. A few of the holdovers are halfback Daryl Bruce, defensive inside linebacker Stan Eamen, and offensive ends Al Mackenzie, Dave Dunkerly and Dan Uniat.

The biggest man on the team is tackle Brian Byrne, whose brother Mike, incidentally plays Redmen ball. Handling the punting chores will be Edwards, while the most promising man to join the Indians is Colin Russel. Colin played Westmount Senior "B" ball for the past two years as an offensive end but Coach Copp plans to use the 197 pounder as a tackle.

Coach Dave Copp said that although the team is rough in

spots the potential is definitely there. Managing the Indians will be Ed Bierbrier.

Daily Sports

SEPTEMBER 30, 1958

MALE FRESHMEN

The Freshmen Physical Education Program commences on October 20. In the past, there has been a last minute rush getting students assigned lockers and purchasing the accepted costume. To avoid the rush, please make an effort to get to the gym before the above date, get your locker and uniform.

Don't forget — SWIMMING TESTS for all who have not shown any swimming credentials on Thursday and Friday, October 9 and 10 between 9:00 a.m. and 4:00 p.m.

ALSO: Registration for activities will be held in the B.W.F. room on October 14 and 15 between 11:00 a.m. and 2:00 p.m.

WOMEN'S SPORTS SCHEDULE

TUESDAY, SEPTEMBER 30:

Archery: Shooting at the stadium, weather permitting, or in the Rifle Range from 12-1 pm.

Swimming: Speed coaching at 8 pm. in the Currie Gym. Synchronized swimming at 8 pm. in the pool.

WEDNESDAY, OCTOBER 1:

Archery: Shooting at the stadium, weather permitting, or in the Rifle Range, 12-1 pm.

Soccer: Practice on the Lower Campus from 4-6 pm. Bring running shoes and shorts.

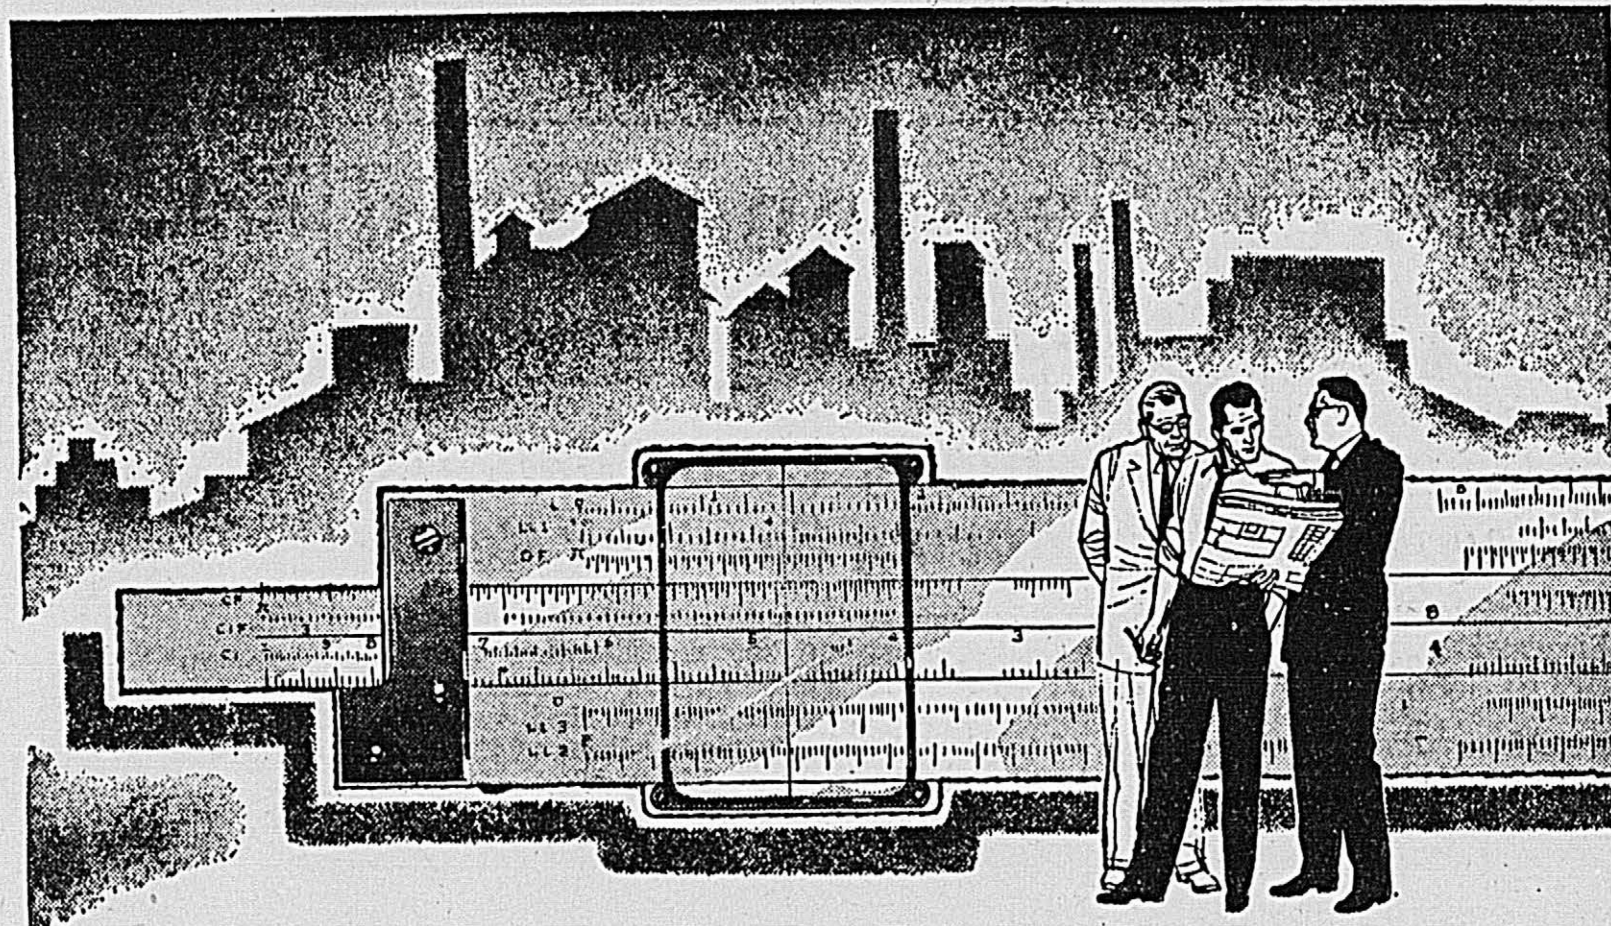

Swimming: Speed swimming and diving at 8 pm. in the pool.

DAILY SPORTS STAFF

There will be a meeting for all Sport Staffers and for anyone interested in Sports writing at 1:00 pm today in the Daily offices in the Union basement.

NOTICE

Students must wear running shoes at all times on the lower campus.

TRAIL, B.C....

University town!

Queen's, U.B.C., McGill, Saskatchewan, Dalhousie—name the University and we'll find you alumni at Trail, Kimberley or some other Cominco operation.

Yes, there are men from every major Canadian University here at Cominco. We've got B.Sc.'s, B.A.'s and B.Com.'s, M.A.'s and Ph.D.'s. You'll find them in all phases of our operations from the new grads in the mines, plants, laboratories or offices to the most senior men in our organization.

At Cominco they've found interesting and

rewarding careers in their chosen fields. They live in pleasant communities in magnificent western scenery where opportunities for sport and relaxation are unexcelled.

Perhaps some of the members of your class will join us in the big job of running one of the world's largest metal and chemical enterprises. In any event, we're looking forward to years of close association with all of you... because metals and chemical products from Cominco enter almost every facet of business, industry and every day living.

Physics Talk In Moyse Hall

Dr. P. M. S. BLACKETT

on the existence of the neutron, a basic particle, even before its actual experimental discovery, which was made by Rutherford's co-worker, Sir James Chadwick, in 1932.

He went on to discuss modern developments in atomic physics since the time of Rutherford, laying stress on the necessity of good technique and alertness, and the role of mere chance in the making of experimental discoveries. The neutron, positron and pi-meson, represent discoveries made partly by chance.

The speaker was introduced by Prof. G. A. Wootton, Chairman of the Department of Physics, and thanked by Dr. J. S. Koster, Rutherford Professor of Physics at McGill.

Choral Society Outlines Plans Of '58 Season

The McGill Choral Society, a voluntary membership organization on the campus, will hold its first day of registration, followed by the first practice, today in the Union Ballroom beginning at 4:30 pm. The Practice will start at 5 pm.

All McGill students, in any faculty and year, are eligible to join the Choral Society, which has no entrance requirements. Weekly practices are held in the Union Ballroom every Tuesday from 5 to 6:30 pm.

Registration will continue at 4:30 pm next Tuesday, and the Choral Society will also have booth at Activities Night the following day, Oct. 8. No student may register after this date.

TUESDAY, SEPT. 30

AMATEUR RADIO CLUB: The club will hold a meeting today in the shack (Union attic) at 1300 hrs. Those interested are invited to attend.

C.I.C.: There will be an opening meeting today at 1:00 pm. In the main lecture theatre of the Chemistry Building. An introductory address will be given by Dr. L. Yaffe, and following this, the president will outline the programme for the year.

CHORAL SOCIETY: The society will hold its first day of registration for all students in the Union Ballroom, commencing at 4:30 pm. The first regular practice will follow in the ballroom at 5:00 pm. Interested students are advised to come early.

WEDNESDAY, OCTOBER 1

SOCIALIST SOCIETY: A business meeting of the McGill Socialist Society will take place at 1:00 pm. in the Union Board Room. Plans for the year will be discussed.

THURSDAY, OCTOBER 2

PLAYERS CLUB: A general meeting will be held in the Lounge of the Union today at 1:00 pm.

Religious Group Plans 'At Home'

The Library of the United Theological College will be the scene of a meeting for all United Church Students on campus.

The event is to take place at 3508 University Street at 8 p.m. on Wednesday. The "At Home" is the first of a series of programs designed to enable the United Church students to meet one another. The group, under the auspices of Principal Laird, hopes to become one of the many religious organizations doing work for students at McGill.

SEC Meeting

(Continued from page 1)

The question was raised whether a committee might not be set up to investigate the possibility of finding a more permanent source of income for the M.C. W.A. The budget for the organization was approved. It allows for expenditures exceeding revenue not in excess of \$4,500.

UNION REPAIRS

It was reported to the Summer Committee that repairs had been done to the McGill Students' Union. A new staircase was built to the attic and there have been numerous alterations to the lounge. Also, the entire ground floor Lobby was repainted.

Roy Heenan read a letter from the World University Service of Canada concerning the proposed tour of Russian Students which had been suggested by the World University Service. The tour has been abandoned due to lack of unanimity among W.U.S. members as to its desirability. As a substitute it was proposed that a tour be made by an international group. This tour will probably take place in October.

There follows a list of some of the appointments made or approved by both the S.E.C. and Summer Committee.

APPOINTMENTS

Finance Director of S.E.C. — Donald Ferrier.

Producer, Red and White Revue — Jon Anderson.

President, United Nations Club — Zafar Khan.

Chairman, Student Artistic Committee — R. Knox.

President, New Union Committee — Stuart Smith.

Editor of Forge — Rowland Philipp.

President, Players' Club — Beverley Rosen.

Chairman, Blood Donor Committee — John Roland.

Chairman, Combined Charities — Peter Cundhill.

Some further matters attended to by the SEC since last May are:

— The formation of a McGill branch of the International Association of Students of Economics and Commerce was approved in principle.

— The budget of the Medical Undergraduate Society was established. The total excess of expenditures over revenue is to equal a sum not to exceed \$1,150.50.

— Subscription rates for non-student readers of The Daily were raised to \$5.

— Reports were submitted to the effect that damage had been done to Molson Brewery Ltd. equipment during the garden party held as a part of Convocation Night activities. McGill (S.E.C.) accepts full responsibility.

— The Secretary-Treasurer reported that the activities of the Student Artistic Committee for 1957-58 had resulted in a larger loss than was expected. A stricter control is to be enforced in the spending of this committee's funds.

McGill Debaters Embark On Trip to British Isles

Two McGill debaters will leave Montreal on October 17 for a debating tour of the British Isles.

Marvin Gameroff and Bryce Weir will participate in eleven debates against top-calibre British teams.

Other details of the Debating Union programme for the year include a series of public debates, beginning on October 10 when a visiting Oxford team will match word and wit with McGill representatives. Harvard will also compete here at a later date.

Student-professor clashes, exhibitions, and a political debate

with leading lights of Canada's three parties are also scheduled.

For novice debaters, including freshmen, the Debating Union plans a programme of instruction in both debating and public speaking. Classes are scheduled for the noon hour in the Walter M. Stewart Room of the Union, commencing October 12.

No dues are required for joining the Debating Union, since all McGill students become members on paying their Students' Society fees.

FEES PAYMENT

All those in Arts and Science who have not as yet paid their fees are reminded to do so immediately. Today is the last day and those who fail to make payment on time will be penalized.

CONCERT TICKETS

SCOPE offers seasons tickets for the Montreal Symphony Concerts to all McGill Students at one-half the regular price. They can be obtained at the Union box office any day this week.

BOOK EXCHANGE

Today is the last day that the Women's Union Book Exchange will be operating in the Union Basement clubroom. It will be open from 9 am to 2 pm.

Fare Leadership

Of all the Montreal public using the transportation system the student feels the recent fare increase the most.

McGill, Sir George, and the University of Montreal are all "street-car colleges", which means that most of the students reside in the city and travel to and from classes by the public transportation system. McGill students lost the use of the Milton Street parking lot, which makes parking almost impossible, and the car-owners of the student body have therefore joined the bus-travelling population.

The student is also faced with the lack of income during the academic session, not to mention the fee raise.

The subject of reduced fares for students first came up in December of 1956, and resulted in a well-remembered vigorous outburst of enthusiasm, costing the Montreal Transportation Commission approximately one hundred thousand dollars. Such outbursts should not be encouraged. The need for action, however, is still here.

It is up to the students and their leaders to bring these facts before the Montreal Transportation Commission, the City administration, and in particular the Mayor of Montreal, who used reduced rates for students as part of his election platform. This can only be achieved in an orderly and democratic manner.

We distinctly recall a rather stormy meeting of the Students' Society which followed the granting of reparations to the MTC. Censure of the SEC was proposed at the time, and eventually a modified motion that "the SEC be asked to give explicit leadership in the years to come" resulted.

The time for that leadership has arrived. Let us not let the calm that marked last August's increase in MTC fares fool us into complacency. Let the duly elected representatives of the students state the cause for reduced fares NOW.

The Scarlet Key

Last year at this time, when the Scarlet Key named its honorary appointees, an editorial appeared in these columns which ended on this note:

In its constitution the purpose of the Key is stated as being the welcoming of visitors and ushering at important events. This is a rather inadequate justification for that body's existence. Any jokers in uniform could be hired to perform such duties. The purpose of an honour society ought to be more lofty; if it was formed to recognize certain qualities then these qualities should be stated amongst the objectives in its constitution.

A year has passed and nothing has been done to redefine the purpose of the Scarlet Key. The Key still carries on its official functions as correctly and as attentively as always. But there has been no thought given to the role of an honour society at a university.

The McGill Daily is published five times a week by the undergraduates of McGill University at 690 Sherbrooke St. West. Telephone AV. 8-2244. Authorized as second class mail, Post Office Department, Ottawa. Editorial opinions expressed are those of the Managing Board of the McGill Daily and not the official opinions of the Students' Executive Council.

Function of a University

The following examination of a university's function was submitted by Professor Louis Dudek of the English Department.

The Canadian writer Frederick Philip Grove, in his autobiography *In Search of Myself*, discusses the function of the modern university and the position of the student:

"In times gone by the university had had one most important function; that is, in times when the imparting of knowledge was its sole function, not the certification of candidates for position or rank in the state. The moment the aim became the latter, the function I am speaking of ceased to operate. It consisted in bringing together the keenest minds from all strata of society; the university levelled, in the field of intellectual endeavour, poor and rich, peasant and lord; and, on the whole, it levelled up; all modern levelling is done downward. Peasant and lord had to meet and could meet because the universities were small. Since university "standing" has become the prerequisite for position in the hierarchy of the state, the institution has become too large and unwieldy; within the student body social distinctions define themselves as rigidly as they do elsewhere.

"No matter what else they may give, school and university should, first of all, bring young people together on the same level. So long as those with whom the student comes in contact derive from the same social stratum as himself, the contact cannot give him anything essential."

How much of this is still true of the Canadian university? Grove was a European by origin and education, and there the class relations are more marked; but if we do not have fast class relations, we have money relations. "The rich are different from us," said F. Scott Fitzgerald. The social structure of McGill University — Faculty and students, Students' Society, Fraternities Union, Faculty Clubs — has a close relation to Montreal city and to Canada. Isn't a lot of it patterned after the society — and often, not the society of today, but the society of fifty years ago?

To The Editor

More MTC

I must state that M.T.C. officials and Mayor Sarto Fournier do not care about the students. They claim that a much needed reduced bus fare would make checking on buses too difficult for the bus driver to handle. This is not so. (This is their reason for causing financial embarrassment to students.)

May I suggest to "our friend Senator Fournier" that college students be issued a special car pass at their university which they show to the bus driver when buying their tickets. This could not overburden the driver nor slow up transportation. However to further facilitate matters any student of a University, no matter what his age may be, should be issued the regular car pass given to all students. Thus the student would have his reduced fare and the M.T.C. driver would have no extra work, and the M.T.C. would have no further excuse for not allowing the students a reduced rate.
